#### Product Description:

A revolutionary product that protects and enhances your driving experience.

Glass Coat creates a hydrophobic (water-hating) barrier on the glass. It makes the windshield bead the water into tight beads. This improves visibility dramatically when raining. In fact, most people don't have to use their wipers during the rain because the water beads and rushes off the windshield.

By improving visibility it also reduces glare during night time driving in the rain. Making night time rain driving safer for you and your family.

Glass Coat also has a secondary benefit. Because it attaches to the glass, it makes it stronger. After applying Glass Coat, the windshield becomes as much as 10 times stronger against chipping and cracking.

Glass Coat is compatible with crash avoidance systems and heads-up displays. It will not harm their ability to perform as designed and should actually enhance the heads-up display while driving in the rain.

Glass Coat is environmentally friendly. It contains no solvents, VOC's, HAP's, Ozone depleting compounds, etc. It is biodegradable and non-toxic.

#### Advantages:

- ◆ Improves visibility
- ◆ Reduces glare
- ◆ Strengthens glass against chipping
- ◆ Makes ice removal easier
- ◆ Compatible with crash avoidance systems
- ◆ Compatible with heads-up display systems
- ◆ Biodegradable, non-toxic formula

#### Part Numbers:

- ◆ Gallon #16-714
- ◆ 5 gallon tighthead # 16-715
- ◆ 55 gallon plastic drum # 16-718

#### Directions:

1. Wash entire vehicle with a good quality car wash shampoo to remove grease and grime from the windshield.
2. Clean windshield using the Glass Coat pre-treatment to remove any and all remaining residue from glass.
3. Apply Glass Coat liberally to the entire windshield. Temperature should be between 50 - 90 F
4. Allow Glass Coat to dry to a haze. About 1 - 2 minutes
5. Buff windshield using a soft, clean, micro-fiber towel.
