Secure Process Intelligence℠

Remote Connectivity
for your
Chemical Controller

sp-i4.com

- **Remote SCADA Connectivity Without SCADA Infrastructure**

- **Uses Cellular Technology to Connect your Chemical Controller to your Phone or Laptop**

- **Reduce Risk and Ensure Uptime**

- **Discover Problems Before Your Customers Do**

- **Reports and Alarm Notifications**

Real-time alarms are delivered via phone, text message, email. Chemical alarm limits and probe calibration notifications. Each alarm is logged with a timestamp on the web portal for tracking and reporting. Settings can be tailored to better fit the customer's alarming needs.

- **Secure Customer Portal**

Data and reports are accessible from a secure web portal from any web-enabled device. Live graphical dashboards to monitor and trend chemical data. Track the operating time and last calibration date for each sensor

Walchem shown in photo. Our solution works with all major chemical controllers.

SPI Cloud Connected
- Cellular connection
- Integrated with chemical controller
